EDUCATION

– **Indian Institute of Information Technology, Una** 2024–2028
B.Tech CSE CGPA: 8.78

– **CBSE Board** 2023
Senior Secondary 95.8%

– **CBSE Board** 2021
Secondary 98.3%

PROJECTS

• **Attendance Tracker** March 2026
React, Node.js, Express.js, MongoDB, JWT, Tailwind CSS, Chart.js GitHub — Live

– Built a full-stack attendance tracker with multi-subject management, attendance analytics, and historical records, supported by 17 REST API route handlers.
– Developed target-based attendance forecasting to calculate required classes and permissible absences for configurable attendance thresholds of 75%–90%.
– Implemented JWT-based authentication, MongoDB persistence, interactive Chart.js visualizations, and a customizable weekly timetable with a responsive, mobile-friendly interface.

• **Receiptly AI** June 2026
React, Node.js, Express.js, MongoDB, OpenRouter API, JWT, Multer, Tailwind CSS GitHub

– Developed an AI-powered receipt tracker that extracts merchant, amount, category, date, notes, and line items from receipt images using OpenRouter vision models.
– Implemented secure authentication and engineered 9 REST API endpoints using Express.js and Node.js for robust CRUD operations, AI insight generation, and image management.
– Built an interactive expense dashboard with categorized spending analytics and AI-generated financial insights.
– Designed a responsive React interface and integrated backend APIs with MongoDB for persistent receipt and expense management.

• **BlogSphere** September 2026
React, Node.js, Express.js, MongoDB, Tailwind CSS, Framer Motion, Socket.IO GitHub

– Architected a full-stack platform with 18+ REST APIs and 4 Mongoose schemas, secured via JWT and bcrypt.
– Engineered a Socket.IO real-time pipeline with room partitioning, delivering live comments with sub-100ms latency and 0% HTTP polling overhead.
– Optimized MongoDB queries using compound indexes and aggregation filters, serving recommendations in a single round-trip and reducing payload size by 85%+.
– Built a Markdown UI with react-markdown and Framer Motion, featuring an 8-action toolbar, 60 FPS scroll tracking, and dynamic read-time estimation.
– Implemented Multer media ingestion (5 MB limit, 3 MIME types) with automated Node `fs.unlink` and cascading MongoDB deletions for 0% stale data.

TECHNICAL SKILLS

• **Programming Languages:** C, C++, Python, JavaScript, HTML, CSS, SQL
• **Frameworks & Web:** React.js, Node.js, Express.js, Tailwind CSS, React Router, REST APIs, JWT
• **Databases, Tools & Deployment:** MongoDB, MongoDB Atlas, MySQL, Mongoose, Git, GitHub, VS Code, Postman, Axios, Multer, Render, Vercel
• **Core Subjects:** Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Discrete Mathematics, Probability & Statistics, Linear Algebra

POSITIONS OF RESPONSIBILITY

• **Tech Team Member:** Force Coding Club, IIIT Una 2024–Present
Participated and volunteered in an Open-Source Workshop organized by the club (Certificate)

ACHIEVEMENTS

• **JEE Main:** Achieved 98.03 percentile in JEE Main
• **Academic Performance:** Maintaining a CGPA of 8.78 and ranked among the top 15% of the batch
• **Algorithmic Problem Solving:** Solved 400+ problems on LeetCode and 200+ on GeeksforGeeks
• **Hackathon Participation:** Participated in the Adobe India Hackathon (Certificate)
• **Competition Participation:** Participated in the Unstop Elite Quiz 5.0 (Certificate)
